

SAT Prep

**Thomas “Andy”
Keller**

Goal: Achieve over
2100 SAT score

**Granite Hills
High School
El Cajon,
California**

**Fall 2011
College Freshman
California Institute
of Technology**

Sharing Our Success!

High School Graduation Date June, 2011
SAT Score Before BLC: 1860 total
SAT Scores After BLC: 2250 total
(740 Crit Read, 740 Math, and 770 Writing)

What is your educational background?

I graduated as valedictorian of my class and always tried hard in school. I was never a good test-taker, however, and even failed one of my AP tests sophomore year. Additionally, since I had not read often outside of school, my vocabulary was not enormously large, and thus I had not done well on the reading/writing parts of the SAT.

What are your goals for college and the future?

I plan to major in physics at the California Institute of Technology and then attend grad school. After that my lifelong goal would be to become an astronaut studying physics and astrophysics in outer space.

Describe your experience with SAT Prep at Brown Learning Center.

The best thing about the SAT prep was the repetition of practice tests and the analyzing of how the test worked rather than just random memorization. Being able to analyze the test on test day was extremely helpful and allowed me to save time and ultimately achieve a better score.

What was your reaction to your new SAT scores?

I was extremely satisfied with my scores and shocked! I wanted to get over a 2100 and was confident that I could, but I never expected to score as well as I did.

Comments for Connie Brown: Thank you =)

How have your improved SAT scores enabled you to reach your goals?

Without my improved SAT scores from this class, I believe there would have been no chance of me getting into the California Institute of Technology which I will be attending in the fall.
